Education

2008	Bachelor of Science: Biology, Aristotle University of Thessaloniki, Greece
2014	PhD Thesis, Department of Medicine, Democritus University of Thrace (DUTH) <i>"Interplay between inflammation and proteases of the blood coagulation cascade". Supervisor: Ritis K, Professor of Internal Medicine, DUTH.</i> (https://thesis.ekt.gr/35169)

Employed experience and current position

2011-2014 / **PhD Student:** “Investigation of new inflammatory mechanisms in autoinflammatory and autoimmune diseases such as Familiar Mediterranean Fever and other periodic syndromes, Gout, Crohn’s Disease, Rheumatoid Arthritis and its subtypes such as Still”. Project Coordinator: Boumpas D, Professor of Medicine, National and Kapodistrian University of Athens. Principal Investigator, DUTH: Ritis K, Professor of Internal Medicine, DUTH. (**SYNERGASIA, ESPA 2007-2011**)

2015-2018 / **Postdoctoral Researcher:** “The role of neutrophils in thromboinflammatory conditions. Examples from the model of Acute Coronary Syndrome, Ulcerative Colitis and Systemic Lupus Erythematosus”. Laboratory of Molecular Hematology, DUTH. Supervisor: Ritis K, Professor of Internal Medicine, DUTH. **Personal scholarship from the Bodossaki Foundation.**

2018-2021 / **Postdoctoral Researcher:** “Novel targets for diagnostic stratification and epidemiologic surveillance of human brucellosis: host-guided molecular study in an endemic area

at the crossroad between Asia and Europe". Laboratory of Molecular Hematology, DUTH. Project Coordinator & Principal Investigator: Skendros P, Associate Professor of Internal Medicine, DUTH. (BMBF/GSRT German- Greek Bilateral Research & Innovation Programme)

2021-2022 / Postdoctoral Researcher: "Study of neutrophil/platelet interaction to identify and validate new inflammatory biomarkers in atherosclerosis and cardiovascular risk stratification (ATHERONET)". Pilot study within the **InTechThrace Regional Excellence Program**, "Integrated Technologies in biomedical research: multilevel biomarker analysis in Thrace". Coordinator & Principal Investigator of InTechThrace: Koffa M, Associate Professor in the Department of Molecular Biology & Genetics, DUTH. Principal Investigator of ATERONET pilot study: Skendros P, Associate Professor of Internal Medicine, DUTH. (**Support for Regional Excellence under "Competitiveness, Entrepreneurship and Innovation", EPAnEK of the NSRF 2014-2020**)

06/2022 - / **Assistant Professor**, Department of Biological Applications & Technology, University of Ioannina

Research interests

My activity mainly focuses on translational research, in clinical models of immunology. In particular, the molecular pathways and immune mechanisms that regulate inflammation are examined, as well as the interactions between inflammation, thrombosis (immunothrombosis) and/or fibrosis. The multifaceted mechanisms of actions of neutrophils, such as neutrophil extracellular traps (NETs), have a central role in my studies. In the context of translational analysis of various human diseases, the cross-talk between neutrophils and other cell populations, including platelets, mesenchymal and endothelial cells, is also investigated. The dissemination of meaningful and applicable results that benefit human health, both diagnostically & therapeutically, is a basic pursuit of the current studies.
